- ✓ Your customers visiting your website,
- ✓ Your sub-agents,
- ✓ Your Call Center team,
- ✓ Your contracted corporate customers purchasing managers.

Which Companies Is **BISAS** For?

- ✓ Agents,
- ✓ Sub-agents,
- ✓ All agencies with sub-agents.

*" Companies with large scale IATA
for small and medium-sized
There are separate versions for non-IATA companies. "*

B2B and B2C System

The increase of airline companies and air tickets prices to the standard that anyone can buy. Who prefer the airline when traveling greatly increased the number of people. In technology with the developments in air ticket purchases most of it is done through online sites started. However, it is possible to sell airline tickets online. Certain criteria are required.

Both **IATA** and **non-IATA** companies can be used designed for BISAS, reliable and **reliable** for the end user the experience of buying tickets in an **easy-to-understand** way offers. Both in the design and in the content place all kinds of tools you need in the management BISAS, **B2B** (Business to Business) and **B2C** (Business to Customer) using trading models it includes separate advantages for companies. This in this direction, we serve you individually or as a bundle.

Thanks to our integrated system with many national and international service providers it is possible to reach users all over the world from your region. Our company, which works with major XML API providers such as **Amadeus, Expedia, Galileo**, is in bisasit also provides the changes and additions that you want to make for you.

Sub-Agency Identification and System

By not being able to become an **IATA non-IATA** because it does not meet the necessary conditions the sub-agents serving as the agents will determine air ticket sales with various profit and commission rates they can make it happen.

All airline ticket sales that work in **B2B** and **B2C** trading models BISAS, which is prepared for the purpose of enabling companies to receive services the **agents** who use it will also identify the **sub-agencies** that they will define in the system by including them in the system through their own accounts, the last they provide access to the user. Working as a sub-agent however, companies that do not sell airline tickets also use BISAS they can sell plane tickets.

In addition, we are non-IATA and communicate with companies that are IATA sub-agents who cannot pass should also contact the agents it can be provided by us.

Sub-Agency B2C Integration Infrastructure System

The **B2C** (Business to Customer) business model they apply thanks to the alt, which is **in direct contact** with the end user the agents also use the aircraft with the collaborations they make with the agents they can sell tickets.

The sub-agency we offer in BISAS is the B2C integration sub-agency to the target groups of sub-agencies with the construction system they are provided to reach them **in the most practical and simple way**. Modules thanks to both agents and sub-agents, the system it can provide access, agents are located in the lower they can also set various sales criteria for their agents.

Corporate Customer Identification System

The corporate customer we often hear about in the **B2B** trading model the term refers to the discount that agents make for various companies and it refers to the business partnership established in line with the campaigns. The most important thing that separates **corporate customers** from retail customers this is the important fact.

With the corporate customer identification system located in BISAS agents, **bulk sales** that they will make to companies or **business their partnership with out the need for any technical support** they can arrange it. Also separate for each corporate client by opening an account, purchases are made **through their own accounts** they can make them complete.

B2C Design Dressing

B2C business that is contacted directly with the end user as far as the content management of your website in the model the image is also very important. Your website if we think of it as your virtual store, **the design of your site it is the window of your store.**

B2C design dressing module located in BISAS thanks to **any template** you want, API by being made suitable for the system by our provider it is dressed up on your website. Located in the template you have selected colors, visuals, panel visibility or fonts any changes you want can be made to it.

User Authorization Module

The most important need of an online sales website is interaction. Internet sites that receive **high interaction rates awareness and reliability** by accessing more users they increase their rates. For this reason, what are the e-commerce sites as much as what they sell or how they look, working in the background their contents are also of great importance. But these content managers it should not be accessible to everyone who works in the company.

Thanks to the user authorization module located in BISAS **who can access and edit which content** by yourself you can decide. New authorizations at any time you can do this or remove the powers that you have previously granted.

Online Pay Integrations

With one move to the flight belonging to many airline companies to be able to access, price comparison can be made and practical the preferred online ticket due to its availability sales services; **user-friendly pay they offer they are leading the industry with their methods.** Creativity and online shopping, where innovation is at the forefront online aircraft sales who want to be permanent in the industry services, paying customers with different payment methods it's affecting. Among these methods are Dec;

- ✓ **Virtual POS,**
- ✓ **Mobile pay systems,**
- ✓ **Transfer / EFT methods,**
- ✓ **There are new generation pay systems.**

Online pay integration module available for you in BISAS it is designed for you to be **the best** in the industry you are in. Thanks to the module **all kinds of payouts** without the need for coding knowledge or different applications it is possible to use the vehicle.

2 API Integrations to Choose From

TURKISH Airlines, Pegasus or Sun in online ticket sales services The API is a bridging task to access providers such as Expresshe'll see. For this reason, there are two different AP Is for you in BISAS we use integration. There are two different AP Is that we use thanks to both the flow of data through your own siteit can provide as well as you will withdraw from IATA companieswe are able to integrate information into the system.

Another privilege included in BISAS is **the use of GDS**. Thanks to the API integration module of BISAS, your website,A global distribution system called GDS (Global Distribution Systems) it integrates into distribution systems and is located on your site **all master data** about airline companies automatically you can transfer it to your site.

Reservation and Sales Information E-Mail Integration

The changing world order necessitates the use of the Internet it increases. Lower cost of users and less allowing them to communicate faster using labor the e-mails that provide it are also quite in the marketing sector he comes across us often.

People who use online ticket sales services, booking then the details of the e-mail you sent suddenly too much is studying. This is also with customers who are end users it also means that you have been contacted **after the booking** He's coming. All kinds of communication with the end user are branded the potential to trust the company by increasing its awareness it multiplies.

E-mail integration of reservation and sales information used in BISAS thanks to all the emails you will send, without the need for manual editing it is automatically transmitted to the user.

Profit, Commission and Discount Administrative Panel

Supplier companies that have an IATA certificate when they wish tickets through their own accounts by agreement with sub-agencies they may allow its sale. Agents; the profit found in BISAS, accounts thanks to the commission and discount management panel **profitability and commission** of all sub-agents who sell through they can determine their rates In addition, sub-companies will also sell the **discount prices** they will make on the tickets to the system different charges for corporate customers by entering they can do it.

Merit Panel

The sub-agencies of the agencies that have IATA certification B2C business that allows you to sell tickets using your accounts in the model, **the amount of entitlement determined** in the agreement their prices are paid at various periods.

BISAS, which has an **innovative, rational and dynamic** functioning, to complete the entire merit process **in the simplest** way thanks to the merit panel located in BISAS it provides Decrees to be made, made between two companies adhering to the agreement in a **faultless and practical** way it will be completed. Unnecessary work with the design of the merit panel you need to get rid of the burden and pay anything it was aimed that you would not encounter a problem.

Multi-Currency Integration

Aiming to sell to every point of the world like tourism **working in sectors with a multi-faceted perspective**, you aim to it allows you to reach the point **in a short time**. At this point online tourism companies that sell as, with all active currencies it has to provide integration. The company that the manager uses currency, **on a daily basis** with exchange rates of active currencies it should be updated.

Multi-currency integration module located in BISAS thanks to it, the daily exchange rate transfer work is done **automatically**. Thus, spent on manual regulation of exchange rates while time is being restored, the employee-caused error rate is also reduced to zero it descends. But sudden exchange rate changes that cannot be predicted in advance in cases where there is, the exchange rate is determined by the panel manager changeable.

Ticketing and Voucher

Agents of the trips that customers want to make providing **the most accurate** information about fees and tariffs creating reservations and collecting the ticket fee they provide services on issues such as. Travel agencies and subanother task of the agents is **ticketing and voucher** it is a shipment.

Ticketing and voucher module located in BISAS travelers who want to sell tickets online thanks to their agents do not deal with these transactions. To take care of by preparing the ticket of each passenger who wants separately **PNR** numbers are transmitted to them via **their E-mails**.

Log System

Log recording, which can be explained as the storage of digital movements, quite a lot in terms of **cyber security** of online trading sites it is important. Such as software, operating systems or hardware log records used in many areas; in the functioning of the system activity records of every transaction that takes place are kept they are files.

Two different log records are kept for you in BISAS. The first of these is **error log**, by detecting all the errors that occur on your site to solve the problem in a short time, the data on the site help to improve and even ensure its security ok. Who has visited your site with error log, the reasons for the withdrawal of users who do not take action from the site, or it is possible to view the losses on the page.

Another digital recording system located in BISAS, the **transaction log**, is both for customers as well as easily control all system or software problems of employees it allows you to. In this way, and during the shopping phase of your customers or after that, you can solve all kinds of problems that he has experienced quickly and easily.

B2B Multilingual Support

If there are no online sites that sell tickets no, there is multi-language support among the tools. Those who want to add multi-language support to their site this is he uses many methods for it. We offer places in BISAS thanks to B2B multi-language support, you can save time and money there is no need for these methods that lead.

Your website from any region of the world visiting consumers; the Turkish language we offer in BISAS, **English, French, German, Slovak** and other languages such as **Urdu, Danish, Dutch** or one of the languages such as by choosing any of the local languages on your site they can buy the found product.

Log Private Profit Definition The Panel

Agencies with IATA certificate working with B2B business model, B2C business model by agreeing with sub-agencies if they wish and they can use it. Sub-agents have their own profitability ratios it is obvious from the tickets they have determined and sold they receive commissions in amounts.

The special profit definition panel located in BISAS provides the system with the easiest way to determine the flow of your dividend it allows you to manage. Thus, the ongoing commercial / material the profit from the partnership; on a daily, monthly or annual basis it can be controlled. With the help of the panel, each sub-agency is different it is also possible to define the amount of snow in quantities.

Sales and Reservations Follow-up and Report Panels

All financial data belonging to your company in the most accurate way **analys is and reporting** are required to be controlled. Online for ticket **sales** services that serve as the most **tracking sales and reservations** at the beginning of valuable reports are coming in.

Online, where the purchase is completed in second seach user who visits the site for sales sites a **potential** navigator with in the virtual storehe's a customer. To follow up with customers, the seller it returns both as a potential and **profit increase**.

With the sales and reservation tracking and report panels we have prepared for you in BISAS which users visit your site, whe ther you are making the right pricing compared to the previous period, your profitability ratio , how much individual users are on your siteit is possible to see what percentage of site visits resulted in sales.

Aircraft System Master Data Control Panel CMS

Master containing the most important information on a website data, reporting and analysis is if they are poorly managed by directly affecting the quality of the site, it becomes inefficient it will cause him to come. For this reason, the master data used is control systems provide great benefits to companies.

Aircraft system master data control panel located in BISAS CMS will overcome the management challenges of enterprises creation of new master data and existing master data is designed for the development of data. Necessary for your site master data such as airlines, cities and airports, which are adding new data to BISAS, which is in a ready state, is also it's pretty easy.
